## Morakniv Floating Serrated Knife

We developed the Floating Serrated Knife for the offshore industry where a floating knife is of high importance. Of course it's features also make this knife a perfect tool for kayakers, people sailing and others spending time on the water, both professionals and sportsmen.

A very lightweight knife with an orange core that makes it highly visible and easy to locate.

An orange high visible sheath with a smart button lets you connect and link several knives from our Craft segment, giving you the opportunity to carry your preferred combination of models.

The coil formed rounding of the ergonomic handle made of cork is a pleasure to hold and doesn't conduct cold.

Easy to take with you by connecting it to your belt, backpack or lifesaving vest with the clip on the sheath.

The thin serrated blade of stainless steel is specially designed for cutting rope, fiber, and nylon.

The rounded tip is keeping you and your boat from injuries and providing a safe practice when cutting rope or nets out on the water.

	Stainless Steel	
	3.78"	96 mm
	9 1/4"	235 mm
	0.055"	1,4 mm
	3.07 oz	87,5g
