

NEW

Next-level Sordin Supreme™ Pro-X family

# Four new audio profiles

Audio excellence made Sordin Supreme legendary. The natural reproduction of ambient sound, with perfect directional sensitivity. The HiFi-like sound quality. Now: The next chapter – four new audio profiles, allowing you to adapt your sound experience to your task at hand. Or simply to your current mood.

## HUNTING

Hunting is the main audio profile for general purposes. The sound image is optimized for a normal hunting day, balancing clear ambient sound such as speech with comfortable low-noise audio.

## SHOOTING

Shooting is a comfort profile with lower gain and a narrower audible frequency spectrum. Perfect when normal situational awareness is sufficient, e.g. in shooting training at the range.

## FOCUS

Focus is your full-alert profile. It features high amplification and a wider frequency spectrum for highest situational awareness. Use this audio profile e.g. in the hunting tower to sharpen your senses before your shot.

## COMMS

In Comms, ambient sound is deactivated and your hearing protector uses passive protection only. However, the 3.5-mm AUX input is active allowing for clear communication even in noisy environments.

Sordin Hear2 is Sordin's next-generation audio system, integrated in the electronic Sordin Supreme family's premium models Sordin Supreme Pro-X and Pro-X LED.
